

simatec app «simatec world of maintenance»

Your personal simatec assistant for efficient and connected monitoring

USP

The «simatec world of maintenance» app is the overarching digital simatec platform: simatec products can be controlled by the app, taking simatec another step into the digital future.

Features

- Monitoring of lubrication points
- Creation of electronic lubrication schedules (Lubechart)
- Calculation programme for the correct setting of your lubricators (Calculation Pro)
- Digital ordering process

Benefit

- simatec products can be controlled with the «simatec world of maintenance» app
- Creation of personalised, electronic lubrication plans with continuous monitoring of all lubrication points
- Thanks to the new Lubechart feature, all lubrication points (manual/automatic) can be managed
- Safe, simplified and efficient maintenance operations
- Simplified, digital ordering process that saves time
- simalube IMPULSE connect can be controlled via Bluetooth connection and can be set in time mode with the app
- Installation videos help with the correct installation of the products
